

## Internship Assignment

“Passenger Terminal Expo 2012”

Prepare and support our presence at trade fair

## We are looking for...

Enthusiastic marketing & communication students (HBO/WO) with interest in (international) trade fairs and expositions to perform an internship at our company on the subject: “Preparations for the Passenger Terminal Expo 2012”.

We ask you to help us with developing a strategy for our presence (with a stand) at the Passenger Terminal Expo trade fair in Vienna. You'll be helping us with executing this plan; stand design, communication means design, marketing plan development, announcing our presence at the fair to customers, organizing the trip towards Vienna, etc.

## About Us

QuinTech is where baggage meets technology and creativity. We – a TUDelft spinoff company – are committed to add real value by developing innovative solutions that remove the hassles from airport baggage handling. Lost or delayed baggage, strenuous working conditions for baggage handlers, and long queues at check-in and baggage drop-off are the primary hassles we tackle. We believe hassle-free is the future of baggage handling.

During the 5 years of our existence we have developed a variety of proven baggage handling automation products, amongst which:

- BAGCHECK – an automatic baggage analysis and classification system
- QUINTAINER – a light-weight and easy-to-handle baggage container
- DROP&FLY® – a super-fast automated baggage drop-off system

Also we have helped our international customers (KLM, Schiphol Airport, London Heathrow Airport, Rotterdam Airport, Eindhoven Airport, Vanderlande Industries, etc.) to improve their baggage handling processes and systems.

## What we offer

A challenging, fun and inspiring environment for you to work in. The chance to make real impact because you work on products and ideas that will be implemented. And – last but not least – an attractive wage or internship payment.
